

Drugs of Abuse Screening

Urine Drug Screening

Willow Laboratories screens and confirms urine specimens for a variety of drugs of abuse including alcohol.

- We offer custom drug panels that test for multiple substances.
- Confirmation testing by GC/MS is available.
- Urine drug screens include adulteration testing.

Oral-Fluid and Hair Screening

Drug screening and confirmation technologies for Saliva and Hair testing are available.

Forensic & Clinical Screening

Willow offers testing for Nicotine, Oxycodone, Buprenorphine, Tramadol and many other specialty substances.

Technology @ Willow Labs

- We offer the latest and most comprehensive drug & alcohol testing technology available.
- For confirmation testing we use GC/MS technology. This identifies and eliminates false positive screens. GC/MS is the gold standard for confirmation testing.
