

## PRESS RELEASE

### **WILLOW LABORATORIES ANNOUNCES LAUNCH OF STEROID TESTING SERVICES**

Lynn, Massachusetts, August 18, 2008 – Willow Laboratories announced today that it has started testing individuals for steroid use. Realizing the growing concern among parents and employers, Willow Laboratories provided this service on a limited basis in January of 2008. Now, Willow Laboratories has expanded its services to include testing for an extended panel of androgenic-anabolic steroids. These tests are performed by GC/MS and/or LC/MS/MS, which is used to detect and identify steroids down to very low levels.

Headquartered in Lynn, Massachusetts, Willow Laboratories offers comprehensive laboratory based drug and alcohol testing services, including GC/MS and LC/MS/MS confirmations. We provide pick-up and collection services with new state of the art mobile collection units. In addition to our urine drug screening, we provide alternative matrix testing of hair or saliva. Willow maintains a staff consisting of: pharmacologists, toxicologists, physicians, and certified medical technologists. Clients can access their results online or directly with their EMR.
